Profile

Computer Engineering student at Politecnico di Milano, with a strong interest in software development and system design. Particularly passionate about UI/UX, I aim to create intuitive and effective user experiences. In addition, I have a growing interest in cybersecurity.

Education

Politecnico di Milano   (September 2022 - Present)
Bachelor's degree in Computer Engineering. Experience in programming courses, human-computer interraction, computer security and data management. Excellent problem solving, teamwork and communication skills, with a practical and innovation-oriented approach.

Liceo Scientifico Statale 'Annibale Calini'   (September 2017 - June 2022)
Diploma with 95/100 evaluation. Participation in the project *Alps4Nats* in collaboration with Erasmus+ and layout designer for *Il Resto del Calini* with different graphic software (Canva, Figma, FireAlpaca).

Experiences and Volunteering

Volunteer - Parrocchia di San Benedetto   (2018 - Present)
Logistical and organisational support during community events, help in the kitchen and space management.

AVIS Volunteer - Blood Donator   (2024 - Present)
Active participation in blood donation, helping to raise awareness of the importance of donation.

Tutor   (09/2020 - Present)
Homework help for students of various age groups.

Buddy System - Politecnico di Milano   (2023 - 2024)
Supporting international students in their academic and social integration within the university.

Animator and Assistant Manager - Grest Parrocchia S. Benedetto   (2017 - 2021)
Organisation of daily activities and management of children, support with homework, entertainment and assistance during meals. Training in first aid.

Volunteer - Book Market of Liceo "A. Calini"   (06/2021 - 09/2021)
Customer reception, cash management, use of specific software and organisation of the warehouse. Application of Covid safety regulations.
