Profile

I'm a tech enthusiast passionate about building software and understanding how things work under the hood. Fascinated by the intersection of secure system design and human-computer interaction, I aim to build intuitive, user-centric software architectures that do not compromise on security. Outside of university, ten years of martial arts training and endurance sports have taught me deep discipline, consistency and the value of stepping outside my comfort zone; qualities I actively bring into every technical project I work on.

Education

MSc in Computer Science and Engineering (March 2026 – Present)

Politecnico di Milano. Specializing in cybersecurity and human-computer interaction.

BSc in Computer Engineering (Sept. 2022 – March 2026)

Politecnico di Milano. Coursework in programming, human-computer interaction, computer security and data management.

Experience

NECSTLab – Politecnico di Milano

Graduate Student Researcher (March 2026 – Present)

- Researched FL strategies using Flower and NVFlare.
- Designed and evaluated hybrid cyclic/bagging model training strategies.

Student Member (Sept. 2025 – March 2026)

- Developed a ML project focused on wearable data analysis for sleep quality prediction on wearable devices.
- Successfully pitched the final project outcomes directly to Garmin management, winning 2nd place.

Politecnico di Milano (Sept. 2025 – Present)

Administrative Support (Contractor)

Managed public relations and university event organization.

Academic Projects

Human-Computer Interaction Project

Designed and developed a user-centric application applying agile methodology. Balanced team dynamics, negotiated project requirements and conducted usability testing to ensure accessible UI/UX interface design.

Software Engineering Project

Recreated a complete online digital version of a complex board game from scratch using Java. Developed a robust client-server architecture with socket programming, applying Object-Oriented patterns, clean code principles and rigorous testing frameworks under weekly deadline pressures.

Technical Skills

- Programming: C, Python, SQL, Java
- Databases & information Systems
- UI/UX design (Figma prototyping)
- Cybersecurity fundamentals

Professional Skills

- Problem solving & critical thinking
- Leadership, teamwork & group management
- Flexibility & adaptation under stress
- Effective communication & pitching

Languages

Italian: Native	French: Bilingual
English: C1 (TOEIC)	Japanese: A1

Certifications

- *TOEIC C1* – ETS (Aug 2025)
- *Introduction to Cybersecurity* – Cisco
- *Cybersecurity* – MinnaLearn
- *Elements of AI* – Univ. Helsinki
- *Open Badge* – Polimi Buddy

Volunteering

Tutor (September 2020 – Present)
Personalized academic support and homework help for students of various age groups.

Buddy System - Polimi (2023 – 2024)
Assisting international students with academic and social integration.

Grest Parrocchia S. Benedetto (2017 – 21)
Animator and Assistant Manager.

Volunteer - Parrocchia S. Benedetto (2018 – Present)
Logistical and organizational support during community events and kitchen help.

AVIS Volunteer (2024 – Present)
Active blood donor.

Book Market - Liceo A. Calini (2021)
Customer reception, cash management, warehouse organization and use of inventory software.

Hobbies & Passions

Combat Sports and Martial Arts
Endurance and Outdoor Sports
Reading and Continuous Learning
